

University Pavilion Application

Much of the innovation occurring in the geospatial and built world is taking place at leading research and technical universities around the world. Universities specializing in geospatial and built world technology research are invited to exhibit in the University Pavilion at Geo Week.

Participating in the University Pavilion allows you to share your latest research, meet industry professionals eager to learn of the newest applications, and promote programs of study. Project posters should be informative and compelling. You are encouraged to attend conference sessions and presentations; however, you are required to always have one representative at your booth to interact with and answer questions from attendees visiting your booth.
